

Domain Vulnerability Scan Overview

Comprehensive intelligence for **<http://altoro.testfire.net>** → IP: **65.61.137.117** – from discovery to remediation.

Risk Index

Risk Index: 4/10

Quick Stats

- Tools executed: 7
- Open ports: 3
- Sub-domains: 0
- Known vulnerabilities: 6

Open Ports by Service (Nmap)

Sub-domains Discovered (Subfinder)

Known Vulnerabilities (Nikto)

Directory Status Codes (Gobuster)

Technologies Detected (Wappalyzer)

Technology	Category	Version	Latest	Status
Apache	Web Server	-	-	Up-to-date

Vulnerability Mitigation & Remediation Steps

HTTP Port (80) Without Redirect (MEDIUM)

Finding: Port 80/tcp - http

HTTP is accessible without redirecting to HTTPS

Remediation Steps:

1. Implement HTTPS redirect from HTTP to HTTPS
2. Use HSTS (HTTP Strict Transport Security) headers
3. Enable SSL/TLS with strong ciphers
4. Consider using Let's Encrypt for free certificates

References:

- <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Strict-Transport-Security>

HTTPS Port (443) Configuration (LOW)

Finding: Port 443/tcp - https

HTTPS port is open

Remediation Steps:

1. Ensure TLS 1.2+ is enabled, disable TLS 1.0/1.1
2. Use strong cipher suites only
3. Implement certificate pinning
4. Regular certificate renewal and monitoring
5. Enable security headers (HSTS, CSP, etc.)

Open Port Exposed (MEDIUM)

Finding: Port 8080/tcp - http-proxy

An unnecessary port is open, increasing attack surface

Remediation Steps:

1. Review all open ports and close unnecessary services
2. Use firewall rules to restrict access to required IPs only
3. Enable port knocking for sensitive services
4. Implement network segmentation

5. Regularly audit open ports with automated scanning

References:

- https://owasp.org/www-community/vulnerabilities/Unnecessary_network_ports
- <https://www.cisa.gov/uscert/ncas/tips/ST04-012>

Missing Security Headers (MEDIUM)

Finding: https://altoro.testfire.net - Missing HSTS header

Security headers are not properly configured

Remediation Steps:

1. Implement Content-Security-Policy (CSP) header
2. Enable X-Frame-Options: DENY or SAMEORIGIN
3. Set X-Content-Type-Options: nosniff
4. Configure X-XSS-Protection header
5. Add Referrer-Policy header
6. Use securityheaders.com to test configuration

References:

- <https://owasp.org/www-project-secure-headers/>
- <https://securityheaders.com/>

Missing Security Headers (MEDIUM)

Finding: https://altoro.testfire.net - Missing HSTS header

Security headers are not properly configured

Remediation Steps:

1. Implement Content-Security-Policy (CSP) header
2. Enable X-Frame-Options: DENY or SAMEORIGIN
3. Set X-Content-Type-Options: nosniff
4. Configure X-XSS-Protection header
5. Add Referrer-Policy header
6. Use securityheaders.com to test configuration

References:

- <https://owasp.org/www-project-secure-headers/>
- <https://securityheaders.com/>

Missing Security Headers (MEDIUM)

Finding: https://altoro.testfire.net - Missing HSTS header

Security headers are not properly configured

Remediation Steps:

1. Implement Content-Security-Policy (CSP) header
2. Enable X-Frame-Options: DENY or SAMEORIGIN
3. Set X-Content-Type-Options: nosniff
4. Configure X-XSS-Protection header
5. Add Referrer-Policy header
6. Use securityheaders.com to test configuration

References:

- <https://owasp.org/www-project-secure-headers/>
- <https://securityheaders.com/>

Missing Security Headers (MEDIUM)

Finding: https://altoro.testfire.net - Missing HSTS header

Security headers are not properly configured

Remediation Steps:

1. Implement Content-Security-Policy (CSP) header
2. Enable X-Frame-Options: DENY or SAMEORIGIN
3. Set X-Content-Type-Options: nosniff
4. Configure X-XSS-Protection header
5. Add Referrer-Policy header
6. Use securityheaders.com to test configuration

References:

- <https://owasp.org/www-project-secure-headers/>
- <https://securityheaders.com/>

Missing Security Headers (MEDIUM)

Finding: https://altoro.testfire.net - Missing HSTS header

Security headers are not properly configured

Remediation Steps:

1. Implement Content-Security-Policy (CSP) header
2. Enable X-Frame-Options: DENY or SAMEORIGIN
3. Set X-Content-Type-Options: nosniff
4. Configure X-XSS-Protection header

5. Add Referrer-Policy header
6. Use securityheaders.com to test configuration

References:

- <https://owasp.org/www-project-secure-headers/>
- <https://securityheaders.com/>

Admin Panel Discovered (HIGH)

Finding: https://altoro.testfire.net/admin/ - admin_panel found at /admin/

Administrative interface is accessible

Remediation Steps:

1. Restrict admin panel access to specific IP addresses
2. Use VPN for admin access
3. Enable strong authentication (2FA/MFA)
4. Change default admin paths if possible
5. Monitor admin access logs
6. Implement rate limiting and account lockout
